

-
- **DESIGNATION OF PRIMARY CAREGIVER**

[California Health & Safety Code Section 11362.5(e)]

A person can be the "Primary Caregiver" if he or she consistently assumes, on your behalf responsibility for your housing, health or safety. In accordance with California Health & Safety Code Section 11362.5(e) which reads as follows:

- (e) For the purposes of this section, "Primary Caregiver" means "the individual designated by the person exempted under this section who has consistently assumed responsibility for the housing, health or safety of that person."

The Patient agrees that he or she will consistently rely on the designated "Primary Caregiver" to indicate that a relationship based simply on providing the patient with medical marijuana will not suffice. The Patient admits that he or she is unable to grow his or her own marijuana as a condition of having a "Primary Caregiver". Therefore, it is likely that a "Primary Caregiver" will be expected to grow the patient's marijuana at or near the patient's locale, as a part of the caregiver's assumed responsibility for the patient's housing, health or safety needs. "Primary Caregivers" are at risk if they bring marijuana to a patient from outside the home, unless they can, show "that the quantity transported and the method, timing and distance of the transportation are reasonably related to the patient's current medical needs." This designation is only to remain in effect for as long as the Patient has a valid updated recommendation or approval to use medical cannabis in treating his or her illness. Lastly, the "Primary Caregiver" understands that caregiver status does not give you permission to use medicinal marijuana.

This service is available by request

[Both the Patient and the designated Primary caregiver with Valid ID must be present]
